

耐水性向上エンジン補機用アイドラ軸受

Idler Bearing with Improved Water Resistance for Engine Accessory

過酷な被水環境での耐水性を大幅に向上シリーズ化により、あらゆる被水環境に対応

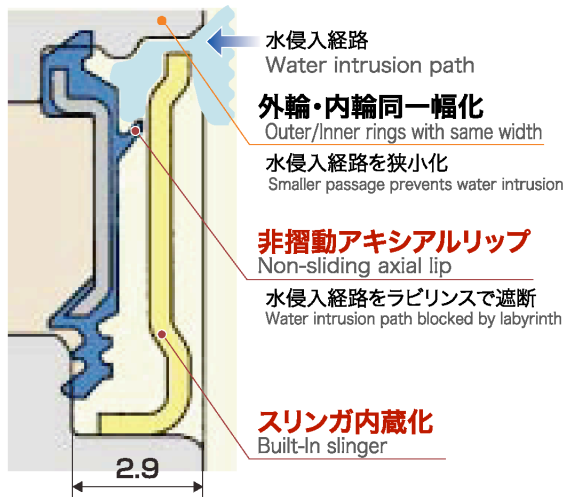

Water-resistance against Severe Water Environments Significantly Improved
- Series Developed to Cover All Types of Water Environments -

特長 Features

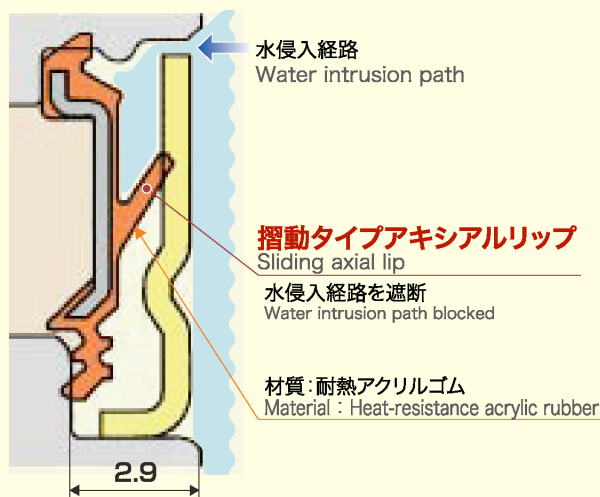

アイドラ軸受
Idler bearing

耐泥水仕様 Specifications on muddy water resistance

耐水没仕様 Specifications on immersing in water

効果 Effect

- 軸受シールとスリングとの間にアキシアルリップを設け耐水性を向上
Water resistance has been dramatically improved by establishing an axial lip between the bearing seal and the slinger
- アキシアルリップのしめしろ最適設計により高速性を確保
High-speed performance has been secured by optimal design of the axial lip interference
