グラインディングセンタ 丁酉5-100

Grinding center TG5-100

The smallest and fastest in the class

ワンチャックで高精度研削

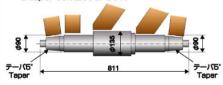

High accuracy grinding with one chuck

高速高精度なといし台NC旋回により 複数のテーパ部も全自動で加工。

Multiple taper portions can be fully automatically ground by means of a highly accurate NC indexing wheelhead swivel.

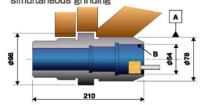

|旋回精度±0.0002°で -パあたり90%

Swiveling accuracy ±0.0002°with a taper contact of 90%

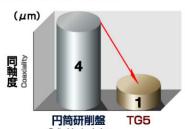

芯出しレスで内外研同時研削

Alignment-free inner/outer grinding simultaneous grinding

B部同軸度(基準A)

B axis coaxially (Datum A)

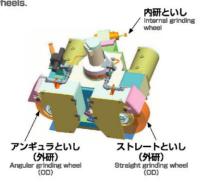

3台の機能を1台に集約

Integrating the functions of three machines into one

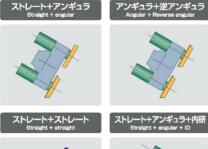

外研2種、内研1種のといしを 切り替えることにより 3台分の工程を1台に集約。

Integrating three machine processes into one by selecting from up to three kinds of two for outer grinding and one for internal grinding

といし取り付けパターン

Wheel attachment patterns

生産性2倍 Doubled productivity テーパ部調整レス No accuracy adjustment time for taper portions. テーパ精度調整時間 100%削減 (min) 40 円筒研削盤 TG5 スピンドル加工時間 50%短縮 (min) 加工時間 Grinding time 230 円筒研削盤 TG5 芯出しレス Alignment-free 100%削減 (min) 30 円筒研削盤 TG5
